President Bob Weidemann
Vice-President Ed Robles
Secretary Alan McRae
Treasurer Aileen Harrison

STACK Editor:

Al Stone

STACK Address:
3788 Windsor Drive
Bethpage, NY 11714

MONTHLY MEETING

Each month, the General Membership meeting is called to order at 8:00 p.m. in Room 508, Building 500, the Old Westbury Campus of the New York Institute of Technology, the third Friday of the month. The May 1980 meeting will be held on the sixteenth. Our speaker this month is Art LeKacos, whose topic will be OASIS.

+ + + +

Fridays of each month. Since we will have more time on the first Friday, we will schedule our big lectures for this night. We will then have more time to devote to organizational matters at the third Friday meetings. During the meeting on the 18th we plan to hand out questionnaires and to hold a question and answer session on any difficulties arising with the TRS-80.
Anyone wishing to join the disk lending library should contact Fred Kemple during the meetings. Fred is our newly-elected librarian.

Bob Zito (516) 822-4031
MICRONET 70330,102

6502 Users' Group - Steve Perry invites all interested parties to join his very active sub-group at 7:00 p.m., the night of the general membership meeting. Steve Perry (516) 744-6462

The LONG ISLAND COMPUTER ASSOCIATION is open to anyone, amateur or professional, with an interest in computers, computer applications, programming, or related subjects. Dues are $10 per year, which includes monthly issues of this publication, The STACK.

COMMERCIAL ADVERTISING POLICY
The STACK offers free classified listings to hobbyists for their offerings and solicitations. Commercial enterprises seeking employees, consultants, or looking for hardware and software may also submit short classified notices for publication without charge. There is a small fee for commercial classified ads which is calculated on an annual basis. We also accept full-tone, camera-ready copy for 1/4, 1/2, and full page displays. Rates are based upon a minimum three month participation, although an advertiser's copy need not be the same in all three months. Write The STACK, or contact your Editor Fridays through Sundays at (516) 731-1649. All submissions must be received no later than the last calendar day of the month prior to publication.

CLASSIFIED NOTICES
For Sale: Microprocessor trainer and programmed learning course for the 6800 computer by Heathkit. Unit is up and running and can be expanded to a full-fledged system (see Heath catalog for details). Many extras have been added to my unit and it is in excellent condition. Jim Temple (516) 822-4083

For Sale: Siemens 8" disk drives, Model FDD-120-8, single/double density;- These units are fully Shugart compatible. Price $355 each.
Tony Casola (516) 541-2263

and personal accounts invited. Aileen Harrison (516) 938-6769

MODEM P.C. BOARD

L.I.C.A. can obtain RACHL-VADIC modem boards (model 81046), with coupling transformer and documentation. These are similar to Bell 103 units, input RS232. Output is standard "originate" tones. The user must supply -12v, +5v, three resistors, two diodes, plus an enclosure. Your cost is $25. Please remit your check or money order to: Long Island Computer Association
Aileen L. Harrison, Treasurer
36 Irene Lane East
Plainview, NY 11803
or give your payment to Aileen at the May 16th general meeting. She will have a sample board with her. This is a great deal for the hardware buff. The modem can probably be mounted inside your computer and obtain power from your bus (40 ma). If there is anyone out there who is willing to "direct" this as a club project so that our software buffs can get in on it? Contact Aileen or Bob Weidemann. Gerry Harrison (516) 938-6769

S-100 NEWSLETTER

Tony Gold's Lifeboat Associates is now located at 1651 Third Avenue, NYC, NY 10028. A new publication, labelled 'Introductory Issue', and dated April, 1980 has been sent to us. While its annual subscription rate of $18, plus $6 for the CP/M Users' Group catalog may strike some hobbyists as a trifle high, there is considerable value in these items. To have both a list of latest versions available of proprietary software products, and a compendium of bugs in those products is of exceptional value to the serious hobbyist/programmer. We trust that the incredible typographical errors encountered in this first emission do not extend to data lists as well as descriptive text. What the heck is a 'partical' list (p.4)? Zoso, hire a proofreader!
