## MONTHLY MEETING

A general meeting is held monthly, on the third Friday evening at 8:00 p.m. in room 508, Building 500, the New York Institute of Technology's Old Westbury Campus. That makes September 19th the date to circle this month. Bring along a report on whatever you're working on at present. If it is deemed to be of general interest, we'll include it in a forthcoming issue of The STACK. Also, why not bring along a friend? As more persons among the public-at-large are becoming enamored of computer technology and programming techniques are now quite widely practiced and discussed, the value of our association is further enhanced. We've yet to meet a new member who doesn't contribute either to our knowledge or enjoyment of this hobby while obtaining whatever it was that they were seeking when they paid their \$10 dues and joined our ranks.

## LOOKING BACKWARD

Aileen Harrison reports that the August meeting was "very nice", as it wasn't too hot and the slides which Hans Napfel showed of different LICA members' computers were "hysterical".

## SPECIAL INTEREST GROUPS

6502 Users' Group - Boy, is our (editorial) face red. During the past two months a printers' devil has gotten through that can be said to be of massive proportions. We've been referring to Steve Perry's sub-group by the numerical designation of a popular Motorola chip. Now, we know that all those KIMs use 6502's.

The sub-group meets one hour prior to the general membership meeting, at the same location.

Steve asks us to announce that he is looking for someone to assist him in the planning of meetings in order to make the group more responsive to members' needs. Further, Steve is seeking an Instructions Manual for the FSM MB-6B 8k memory board. He'd like to borrow one to copy for his personal use.

Call Steve Perry (516) 744-6462

8080/S-100 Users' Group - Augie Schwab's group meets one week prior to the General Membership meeting....same hour and location.

TRS-80 Users' Group - No correspondence received.

Contact Bob Zito (516) 822-4031

The LONG ISLAND COMPUTER ASSOCIATION is open to anyone, amateur or professional, with an interest in computers, computing, or programming. Dues are \$10 per year, a fee which includes a subscription to this newsletter, The STACK. Members can vote in club elections, place non-commercial classified ads without charge, and commercial classified ads at nominal cost. Member articles and other data affecting The STACK must be received no later than the last calendar day of the month prior to publication. As your editor is self-employed, and travels virtually all the time, telephoning or using the CBBS as a means of contact are not recommended.

#### CLASSIFIED NOTICES

Stephen Gladstone (203) 866-8930

#### NEW PRODUCT

Strategems Company, Box 786, Taylor, MI 48180 offers what they call a new dimension in computer gaming for two players called STARCRAUISER. Their game is another in the genre of interstellar exploration and conquest, but combines features of board games and computerized games. Their TRS-80 (Lev II 16k) version is \$11 (including postage). Product description is free.
