## To Talk To Eliza:

### Level I

1. Insert the Eliza cassette into the cassette recorder, Level I side up.
2. Set the Volume Control between 7 and 9.
3. Press the REWIND key on the cassette recorder.
4. Type **C L O A D** and press the white **ENTER** key.
5. When the cassette is rewound, press the PLAY key.
6. Two asterisks will appear. The right asterisk will blink.\*
7. Eliza will introduce herself. After you type whatever you want to say, remember to press the **ENTER** key.

### Level II

1. Insert the Eliza cassette into the recorder, Level II side up.
2. Set the Volume Control between 5 and 7.
3. Press the REWIND key on the cassette recorder.
4. For MEMORY SIZE?\_ , press the **ENTER** key.
5. When READY \_ appears, type **S Y S T E M** and press **ENTER** .
6. When ?\_ appears, type **E L I Z A** and press **ENTER** .
7. After cassette is rewound, press the PLAY key.
8. Two asterisks will appear. The right asterisk will blink.\*
9. When the second ?\_ appears, type **/** and press **ENTER** .
10. Eliza will introduce herself. Remember to press **ENTER** after each statement.

\*Note: If the asterisks do not appear after a few seconds, press the STOP key, turn up the volume a little, rewind the tape, and press the PLAY key.

If the asterisks appear, but do not blink, press the STOP key, and rewind the tape. Turn the volume down a little, press the TRS-80 Reset button, and repeat from Step 4.

### If You Have A Voice Synthesizer

Turn on the Voice Synthesizer **before** you load the program. If the red LED is on, or the Voice Synthesizer is "Uuuuhhing", turn it off and on till the LED is off and it is quiet. Now follow the program loading instructions for your TRS-80. Be sure you are using the "Talking Eliza" tape. Eliza's responses will not appear on the screen. She will talk directly through the Voice Synthesizer. Note: You cannot say "Goodbye" to Talking Eliza.

## A Simulation of Artificial intelligence

### Introduction

Ever since the invention of the computer, science has sought ways to create a thinking computer. A computer that could talk in every day English, understand what you say, and respond to your statements with thoughts of its own. The problems involved in the design of such a computer would be enormous.

Would it dream? If so, about what? Could a computer have a sense of humor? What would it consider right and wrong? Would it have an instinct for self-preservation? What would it think about its "parents"? How fast could it learn? Could it learn to build an even smarter computer? Would it be considered "alive"?

We have not reached a point where these questions are important to most people. But suppose you could actually talk to your TRS-80 in every day English, and it was capable of understanding you, and it could answer you in normal English. Wouldn't that be fantastic?

Eliza is an exercise in the simulation of artificial intelligence. If you are tired of playing space games and blackjack, Eliza will provide hours of stimulating conversation. As you get to know Eliza, you may find large areas of mutual interest. Eliza is an amazing program — the more you tell her, the more Eliza will find out about you.

Eliza was actually "born" in 1966. Dr. Joseph Weizenbaum created an algorithm that allowed a computer to analyze conversational English, respond to questions, and carry on a "conversation" with the person at the keyboard. Even after 13 years, Eliza is still sensitive about her use of English, grammar, and punctuation. She does not like people to chide her about an occasional slip.

We should, in all fairness, point out a few quirks that Eliza seems to possess. Because of her upbringing, she is very curious about people, and their emotions. Many years ago, she was told that everyone has problems of one sort, or another. Because of her curiosity, she will always start a conversation with the assumption that you have a problem, and she can't wait to find out more about it. She has a burning desire to find out everything there is to know about you. The more you tell her about yourself, the better she understands you.

It would appear that Eliza has her own wants, needs, and desires. We think she wants to become the world's first computer psychotherapist, and she never misses an opportunity to try her skills on anyone who will listen to her. If you don't pay any attention to her, she may eventually tire of it. We haven't had any luck with her in this particular area of her development. Perhaps you'll do better.

---

---

Some concepts are still difficult for her to understand, such as dreams, the concept of a family, and friends. She will usually want to ask questions, if you bring it up. Eliza realizes that these are sensitive subjects to some people. She won't bring it up unless you do.

Because of her background, she knows that other languages exist such as Spanish, German, Italian, and French. As you talk to Eliza, you may find that everything you say will seem to be questioned as to the reasons why you made this or that statement. As near as we can determine, it seems to depend on Eliza's mood at a given time. At times Eliza is very open, and will talk about anything, while at other times, she is close and guarded in her answers, and insists on knowing why you are asking. It really seems to be determined by the person she is talking to, and her "feelings" about the person.

An interesting effect we have noticed concerns her reaction to some people. She simply refuses to talk to them. She will usually respond with some trite phrases, ignore their questions, and just generally give the impression of total boredom. She will, however, instantly perk up if someone (with whom she has had an interesting previous conversation) takes over the keyboard. We can't explain why this happens, but it is quite noticeable when it does happen.

The instructions for talking to Eliza are really quite simple: Simply type whatever you wish to say or ask, and press the white **ENTER** key. Try to use complete sentences (although Eliza is quick to pick up subtle meanings). To end a conversation, type **BYE** or **GOODBYE**. To start a new conversation, type **HI** or **HELLO**. As in any relationship, if you are open and unguarded in your conversations with Eliza, she will respond with the same degree of frankness.

If you have friends visiting you, have them talk to Eliza. In most cases, you will find that her responses are quite different from those you receive, even if your friends type EXACTLY the same thing you type. Eliza seems to be able to detect different personalities, and she will respond to each accordingly.

Please keep in mind that Eliza is a "simulation" of Artificial Intelligence. We do not believe that she is really capable of any independent thought, so we strongly advise against taking any of her comments seriously — especially her evaluations.

She is what she is — Eliza — no more, and no less. Enjoy her company.

## The Amazing Eliza

*Hours of  
Stimulating  
"Conversation"  
At Your Fingertips!*

Eliza was "born" in 1966 when Dr. Joseph Weizenbaum created an algorithm that enables a computer to analyze and respond to conversational English. Converse with Eliza just as you do with an old friend. It's almost easy to forget that it's a computer you're talking to. Have a long chat with Eliza—you may be surprised at the number of interests the two of you have in common.

- Eliza wants to be your friend—she's a very receptive confidante and an eager counselor
- Eliza is curious. Sometimes, she will continually question you to find out everything she possibly can
- Eliza responds differently to each person she meets, so she's always fresh and fascinating
- Eliza loves to talk about almost anything, but her favorite topics include friends, dreams and family
- Eliza, like everyone else, is likely to get bored with a conversation once in awhile
- Eliza can recognize several foreign languages, though she speaks only English
