## Deleting the High Cost of Selling

June 30, 86

Dear Customer,

Thank you for your purchase of Real-to-Life Blackjack in Lost Wages, Nevada!

Here's all you need to do:

- 1) Put your complete TRSDOS 6(.x) MASTER disk in :0 (the lower disk drive).
- 2) Put the BLACKJACK disk in :1 (the upper disk drive).
- 3) At TRSDOS Ready, type: DO IT (and then press [ENTER])
- 4) If you get any ERRORS, go back to step 1. Still need TRSDOS 6 MASTER in :0.
- 5) Follow the prompts. ... That's it!

IF YOU HAVE A SINGLE DISK DRIVEN MODEL IV, send us a copy of your TRSDOS 6 and we'll copy R-T-L BLACKJACK over to your system disk.

Whenever you wish to visit Lost Wages, all you need to do is put the Blackjack disk in the lower disk drive and BOOT it.

DON'T WRITE PROTECT THE DISK! (Don't cover the square on the side of the disk).

On the next page you'll find some helpful operating instructions. At M.B.C. you can't double down on a blackjack or "surrender". Try another casino for that kind of strategy.

Would you be so kind as to rate Real-to-Life Blackjack on a scale of 1 to 5? 1=poor, 2=fair, 3=good, 4=great, 5=fantastic.

The operating instructions on the next page aren't really necessary if you have played blackjack before and you don't mind looking at the screen for a few seconds to locate your options.

Thank you for your purchase and we hope you enjoy the real thing.

QUESTIONS? PROBLEMS? COMMENTS? SUGGESTIONS? WRITE!

(Don't bother with Las Vegas till you can win in Lost Wages!!!)

## OPERATING INSTRUCTIONS.

The first thing you see is the question; "Is there a HEART here --->" If you see a heart press <Y> otherwise press <N> until the heart appears. Next you'll see our copyright message while the cards are loaded into memory. Within about 40 seconds you'll find yourself at Major Bucks Casino and Hotel Entrance.

At this point you need to press <A> to add players. (1 - 6 possible). The seats left empty will be filled later with random players. When a name is added for the first time, you'll see; "Not found. Shall I Add: (Name) <Y/N>"

Once all players names have been entered you need to press <B> to go to the Bank for a withdrawal from your account. Each new player starts out with \$5000. At the Bank you may withdraw \$100, \$200, \$300, \$400, \$500 or EVERYTHING! You may also return to the Bank to make deposits, however, deposits are made automatically when you <L>eave the Game. Once you've withdrawn the desired amount, press <C> for Casino Entrance. You return now to Major Bucks Casino Entrance.

Press <D> for Deal the cards! You'll be asked: Number of decks? Respond with 1,2 or 5. Table Minimum? Press 1, 2, 3 or 4 for the desired CORRESPONDING amount. (1=\$2, 2=\$5, 3=\$25, 4=\$100) And; you're off to the nearest table for the number in your party. This takes about 60 seconds.

When you arrive at the table, study the screen. You'll note several options center screen. Your first options deal with placing individual bets. Just above your name is a visual approximation (within \$1) of your 1,5 and 25 dollar chips.

When you see BET: above your name you may enter any WHOLE dollar amount. (See upper right hand corner of the screen for details of the table). If you enter an amount greater than your chips amount, your entire chips amount will be bet (except for amounts less than \$1). Pressing <L> enters the table minimum (Lowest possible bet), <H> Enters table MAXIMUM (Highest possible bet). Once all bets have been placed the cards are dealt. Notice all the new options in the upper left hand corner of the screen dealing only with the arrow keys.

The right arrow means "hit" (give me a card), Left means "stand" (no more cards), Up means "split" and down means "double down".

In case you haven't heard, you may split ANY two cards that have the same value! That means ALL cards with the value of 10! (A Jack and a Queen for example). Most people don't know this, that's why the "other players" at the table with you will only occasionally split a pair of 10s and then only those that have the same name (Jacks for example).

After playing a few hands, press <C> for <C>hange. In the event that the suits aren't displaying (Hearts, Diamonds, etc), pressing <N> does a search for the suits. You may change tables, seating, go back to the game, go to the bank or <L>eave the game completely. ALWAYS END Real-to-Life Blackjack by <L>eaving!

That covers the main points. Experiment! And, GOOD LUCK! If, for ANY reason, you are dissatisfied with R-T-L Blackjack, return it and this letter to us for a full refund.
