

# SPEAK!

...adds lips  
to your TRS-80

A new program that lets you make  
true-to-life speech a part of  
your programs.

MODEL III  
48K Disk System Only

(c) 1981 William V. Neville, III

SPEAK! allows you to talk to your TRS-80 Model III and create word or phrase files which can be accessed by any of your programs on a Model I or Model III.

A cassette recorder (or other mike and amplifier) and a small amp/speaker are the only equipment required.

Best of all, NO VOICE SYNTHESIZER is needed!

ADDENDUM

You may now execute SPEECH by typing

SPEECH n

where n is a number between 0-9 and represents the number of extra buffer areas to reserve. All messages other than the banner and copyright notice will be suppressed. SPEECH without any parameters will perform as indicated in the manual.

An additional demo program is on the disk als. After reserving 4 extra buffers, run HANG,AS from BASIC.

The SPEAK! distribution diskette was formatted in single density with MODEL III readable directory protection. However, the diskette may be read on the MODEL I by using NEWDOS 80, LDOS, DOSPLUS.
